CHILD CARE BENEFIT RATE CALCULATOR for 2014-15

Max CCB 1 child = $205 pw.

Note: This model assumes that a family's hourly gross child care fees are >=$4.1 ph for 1 child, >=$4.28 ph per child for 2 children and >=$4.46 ph per child for 3 children.
In practice, where a family is charged fees which are below the CCB maximum rates, their CCB entitlement cannot exceed the fee charged.

Where a family is charged a fee which exactly equals the standard hourly rebateable fee, they receive 100% for their child care costs.

		100% of the standard hourly rebate applies	85% of the standard hourly rebate applies	110%,108%-102%, 100% of the standard hourly rebate applies	133%-100% of the standard hourly rebate applies	133% of the standard hourly rebate applies	85% of 133% of the standard hourly rebate applies
