One of the environment grants I announced last week was for **South Eastern Centre for Sustainability** in Mount Eliza.

South Eastern Centre for Sustainability is a very exciting community project and I was very happy to announce, with Environment Minister **Melissa Price MP**, that it would be receiving \$20,000 from the Federal Liberal Government's Communities Environment Program for their environmental bridge project.

This will go a long way in helping to connect the property and make it a beautiful educational destination for locals and beyond.

Another of the grants I announced last week for the wonderful **Down's Estate Community Project** in Seaford.

The Down's Estate is an exceptional community project and I was very happy to announce, with Environment Minister **Melissa Price MP**, that it would be receiving an additional \$10,000 as a part of the Federal Liberal Government's Communities Environment Program.

This will go a long way in helping to develop the property into even more of a hub for the whole area, adding to the two previous grants totaling nearly \$15,000 I've secured for Down's Estate previously!

One of the grants I announced last week was for the exceptionally hard working **Friends of Langwarrin Outdoors and Waterways**.

It's been great to be involved with Suzie Webster and this community group and I was very happy to announce, with Environment Minister **Melissa Price MP**, that FLOW would be receiving \$7,500 as a part of the Federal Liberal Government's Communities Environment Program.

This will go a long way in helping FLOW purchase the things they need to keep Langwarrin's flora and fauna protected, nurtured and clean.
