

First of all, i would like to introduce myself. I am Myat Myat Khine living in Perth since 2005 with my lovely family in a fabulous country.

For public hearing ,

(1) i have a one question in below

(2) a few words to explain why we should take action on relatives living here.

Since 1958 General Nay Win's governmental era, military has been oppressing and killing not only the people who were against them but also their family members. The inhumane act keep passing down to the new generation of dictators from the dictatorial ancestors.

Now most families of illegitimate military are living , working and enjoying of the freedom in Australia as citizens , permanent residence and other types of visa holders.

My question is

How can Australia government take action on them significantly ?

If Australia government consider their cases with the humanitarian view, surely Illegitimate military will know that they can break the humanitarian law with impunity for them and for their families living in Australia.

As a citizen, i would like to request that we will not let the generation of dictators to be free in any community in any place.
