Parliament of Australia
Lodge a Submission - Personal Submission

To Whom it may Concern,

**Inquiry: The Public Governance, Performance and Accountability Amendment
(Vaccine Indemnity) Bill 2023**

Granting indemnity to big pharma is an outrage. How did it happen? Were the public consulted? Who in their right mind would have granted these rapacious businesses indemnity in the first place?

The general public (me included) have woken up. Big pharma have captured regulators in USA, Australia and elsewhere and have been permitted over decades to peddle unsafe vaccines without consequences for injuries. Let's end this now.

With this submission I heartily support the Finance and Public Administration Legislation Committee to amend the existing bill to ensure that indemnities CANNOT be granted to manufacturers of a vaccine in relation to the use of the vaccine.

Yours sincerely

Glenn Wormald
