CANBERRA ACT 2600

By Email: fadt.sen@aph.gov.au

Dear Sir or Madam,

Submission from the Australian Council of Wool Exporters and Processors To the Foreign Affairs, Defence and Trade Committee re the China Australia Free Trade Agreement Implementation Bills

Thank you for the opportunity to make a Submission in relation to the Customs Amendment (ChAFTA Implementation) Bill 2015 and the Customs Tariff Amendment (ChAFTA Implementation) Bill 2015

Wool exports to China have been a major source of export income for Australia for many years; particularly over the last 20 years. The rise in China's demand for wool has been part of China's rise to be the world's largest manufacturer of textiles.

The Australian Council of Wool Exporters and Processors has worked with the Department of Foreign Affairs and Trade on this Agreement since the then Minister for Trade, the Hon Mark Vaile, announced on 28 April 2004 that:

"Australia and China have agreed to fast-track their scoping study on a possible Free Trade Agreement after a meeting between Australian Trade Minister Mark Vaile and his Chinese counterpart Bo Xilai in Beijing vesterday."

The FTA with China is of great importance to the wool industry, as China is Australia's major customer, taking between 74% and 79% of Australia's wool exports in each of the last five years, including 2014/15.

The Australian Council of Wool Exporters and Processors has made Submissions to other Parliamentary Inquiries re ChAFTA.

Our Submission is addressed under the following headings:

- 1. Background
 - 1.1 Australian Council of Wool Exporters and Processors Inc (ACWEP)
- 2. The Impact of ChAFTA on the Chinese Domestic Wool Industry
- 3. Points Relevant to Australia Wool Exporters and to Chines wool importer re implementation of ChAFTA
 - 3.1 Interpretation of Words
- 4. Quota Administration
 - 4.1 Country Specific Tariff Rate Quota (CSQ) Administration
 - 4.2 Tariff Rate Quotas (TRQ)
- 5. Ongoing Trade Negotiations with China

Appendix I Destinations for Australia's Wool Exports by Value, 2014/

Appendix 1I Destinations for Australia's Wool Exports by Value, 2014/15

1. Background

1.1 Australian Council of Wool Exporters and Processors Inc (ACWEP)

The Australian Council of Wool Exporters and Processors represents Australian wool exporters and processors in relation to matters associated with the purchasing, processing (if done in Australia) and exporting of wool.

This involves interacting with:

- Wool grower organisations.
- * Wool brokers, who facilitate the exchange of ownership via auction of most Australian wool.
- * Other service organisations, such as the Australian Wool Exchange and the Australian Wool Testing Authority.
- * The Federal Department of Agriculture, generally on matters relating to the veterinary / biosecurity requirements of customer countries; and to a lesser extent on Australian requirements for importing wool.
- * The Department of Foreign Affairs and Trade on non-veterinary trade issues, in particular on Free Trade Agreements.
- * Equivalent wool exporter organisations in other wool exporting countries.

2. The Impact of ChAFTA on the Chinese Domestic Wool Industry

Australia has been granted an annual Country Specific tariff-free Quota of 30 million kilogram (mkg) of clean wool, increasing by 5% per annum. This is small in relation to Australia's annual wool exports of around 180 mkg clean to China in 2014/15; or in terms of Australia's wool exports of around 240 mkg to all countries in the same period.

The granting of a CSQ of 30 mkg, or even for all of Australia's annual production of 240 mkg would not impact on Chinese wool farmers because, although China has more sheep than Australia:

- * They are used for meat and milk production, as well as wool production.
- * The wool is of poorer quality, is generally broader in fibre diameter than Australia wool; and is more likely to be used in lower-end products than Australian wool.
- * The Chinese wool textile industry is the largest in the world and relies on the supply of Australian wool to manufacture high-end garments and fabrics for export.

3. Points Relevant to Australia Wool Exporters and to Chines wool importer re implementation of ChAFTA

3.1 Interpretation of Words

* Experience gained by New Zealand wool exporters has been invaluable; and highly relevant to Australia's negotiations with China. It indicated that there can be some surprizes.

Advice from New Zealand was that their FTA refers to wool exported to China under the CSQ as being exported "directly" to China. Unexpectedly for New Zealand, China interpreted "directly" to mean on the one vessel from New Zealand to China. However, virtually all New Zealand wool exports to China are transhipped to another vessel on route to China. China interpreted this as falling outside their definition of "direct", despite the fact that the containers are not opened or interfered with in any way during transhipment.

The "solution" for New Zealand exporters has been to obtain a "Transhipment Certificate" from the country where the wool is transhipped attesting to each consignment's integrity. Advice from New Zealand is that the "Transhipment Certificates" cost about \$US400, plus logistical inconvenience.

The Australian Council of Wool Exporters and Processors provided this advice to DFAT with a request to avoid a similar occurrence with the Australian FTA, as all wool exports from Western Australia to China are transhipped in Singapore.

Advice from DFAT is that this issue has been addressed. They have provided us with a copy of the wording in the Agreement; and have advised that it will again be raised during the implementation negotiations.

- * We do not know, but it could well have implications for other commodities.
- * In a similar situation (but unrelated to ChAFTA), an Australian wool exporter recently had a container of wool retained under Chinese Customs and Quarantine control for two weeks because of what appears to have been a misunderstanding of all circumstance under which the Health Certificates that accompany wool consignments to China may be issued and printed.

The Chinese Customs and Quarantine Authorities subsequently released the container after receiving a detailed explanation from the Australian Department of Agriculture.

While the matter was resolved, it took considerable input from the Department of Agriculture; and provided further evidence of the problems that can occur through different interpretation of words.

4. Quota Administration

4.1 Country Specific Tariff Rate Quota (CSQ) Administration

The Australian wool industry has received a 30 million clean kilograms (30 mkg) CSQ incrementing by 5% per annum for nine years.

It is understood that the first 30 mkg imported into China each calendar year will be allocated against the CSQ; and will enter China free of tariff. All other wool exports to China will come under the 287 mkg (clean) Global TRQ applied to wool exports from all countries; and will be subject to a tariff of 1%.

This is arguably the most satisfactory method of implementing the CSQ; and is understood by Australia wool exporters.

Wool imported into China in excess of the 287 mkg is subject to a 38% tariff, but, in practice this is not applied as China does not allow the 287 mkg TRQ to be exceeded.

This arose as an issue in 2007, when the 287 mkg TRQ was fully allocated, but not filled, by July. It was resolved only by Chinese importers, who did not have Quota allocated to them, buying it from those who had surplus Quota; thus adding costs to Australian wool exporters and Chinese importers.

China now reallocates unfilled Quota once 70% of the 287 mkg TRQ is allocated. It is understood that this has happened in September this year.

The receipt of a CSQ (such as Australia's and New Zealand's) benefits other countries as any CSQ is outside of the Global 287 mkg TRQ. In the case of Australia and New Zealand, it effectively adds a combined 60 mkg to the 287 mkg.

4.2 Tariff Rate Quotas (TRQ)

While reduction of tariff rates is an important consideration, alleviation of other barriers to trade is also important.

This includes the application of TRQs.

In practical terms China is unlikely to import the 347 mkg of clean wool provided for in the TRQ of 287 mkg and the Australian and New Zealand CSQs, each of 30 mkg (and increasing by 5% per annum).

Under these circumstances, the need for a TRQ for wool starts to lose its relevance. There is little doubt that once this stage is reached, both the Australian wool industry and the Chinese wool processing industry would benefit from the abolition of Quotas.

China has done much to liberalise its trading arrangements in recent years. The abolition of Quotas would be one more step in that process.

5. Ongoing Trade Negotiations with China

We understand that China has granted Australia "Favoured Nation" status; and has agreed to a review of ChAFTA in three years. These are very good outcomes. Hopefully, further mutually beneficial liberalisation of trade can arise from the Review.

Peter Morgan Executive Director
