

SUPPORTING INCLUSION

Online Learning Program

'**Supporting Inclusion**' is an online learning program that is based on the principles of person centred active support, and is focused primarily on how this framework can be applied not just within supported accommodation services, but also out in the community.

The online learning program has been developed to create a space where disability support workers can think about what social inclusion means for people with intellectual disability, and learn or refresh some useful tools and strategies to support people with intellectual disability in ways that will promote their social inclusion.

The resource has eight modules of learning which include lecture and activity videos, exercises, reflective questions and access to further information. The resource can be used from smart phones, tablets and computers. A workbook and additional resources can also be downloaded from the site. The resource is available now, at no cost, via the link below.
