Subject: FW: [CPS AND DOCS ALLOWS CHILDREN TO BE DRUGGED AND RAPED] Thousands of Toddlers Are Medicated for A.D.H...

Date: Monday, 19 May 2014 12:52:11 PM

To all concerned with this particular email, as that use are aware of from time to time I receive different emails within my inbox that concerns me greatly, as I do not want to see Australian children go down the same road as the United States and be able to medicate our young children on these very dangerous narcotic psychotropic drugs I mean my god only toddlers that have not been able to begin a life for what that they are meant to live, like for heavens sake what on earth is this world coming too a psychotropic drug addicted society, to create more problems for extended and distant as well as those immediate families just to feed money to the likes of these psychiatrists, paediatricians, and psychologists pockets as these are not there children as they are experimenting on someone else's child and trying to think that it is all genetically linked, so now who has the mental illness, ask yourself these questions in depth, as this has gone way too far our human race needs to wake up to themselves before ALL IS LOST, and let live things that was meant to live instead of destroying and burning holes in human beings brains and especially at such a very young age, and what right have we got too assume over another human beings personality trait and what are these psychiatrists or psychologists or pediatricians trying to prove, to try and make out that there is such a generic disease or trying to make out that the first one to discover a generic disease is to win a Nobel prize, upon when the ADHD or ADD does not really and truly exist, and every single script administered gives another family a lost cause by these so called professionals to try and clone society to how others think just like themselves and as I had said before, how can anyone "DEFINE NORMALITY", by for now and take care and god bless. and if anyone finds it difficult to get into this particular website the web site address is www.nytimes.com , bye for now once again and take care to all concerned.

Yours Truly,
Mr Maxwell Roy Brazel
