Dear Ms Kohen

Thank you for the opportunity to review the Hansard record of my appearance before the Committee. I noticed that I made two errors of fact and would appreciate it if these corrections could be noted by the Committee.

- On page 6 I described the Report on Carcinogens as being produced by the US Environmental Protection Authority. In actual fact, the RoC is produced by the National Toxicology Program.
- On page 8 I stated that dieldrin is broken down to aldrin in the blood. But it is actually that aldrin is broken down to dieldrin in the body

Thank you

Lin Fritschi
