I've been working with the **Environmental Defenders Office** to prepare legislation ready to protect our koalas.

Not empty promises. Legislation.

It starts with the profitable Great Koala National Park, closes sneaky loopholes and includes ending Native Forest Logging.

Koalas Die In at the feet of NSW Environment Minister James Griffin.

Griffin has been responsible for logging Koala habitat, despite its path to extinction due to habitat loss.

Native forests are in urgent need of protection. Vote for change!
