Safer Local Roads and Infrastructure Program - Projects approved for funding (as at 31 January 2025)

Eligible proponents: State, Territory and Local Government Entities.

Scope: Approved projects since 2015. All projects listed were approved under either the former Bridges Renewal Program or the former Heavy Vehicle Safety and Productivity Program.

Objectives: The Safer Local Roads and Infrastructure Program (SLRIP) provides funding to address current and emerging priorities in road infrastructure needs, with focus areas such as improving road safety, productivity, bridge renewal, road resilience, sustainability and heavy vehicle rest areas. The SLRIP consolidated the former Bridges Renewal Program and Heavy Vehicle Safety and Productivity Program from 2024-25. Existing approved BRP and HVSP projects will continue to be delivered under SLRIP until they are completed.

Project selection: Applications for SLRIP undergo a three stage process within the Department including: eligibility assessment, merits assessment, and a quality assurance process. Projects approved under the former BRP and HVSP also included input from state and territory road authorities (for council-led projects). Only proposals which are eligible and demonstrate good value for money were recommended to the approving Minister for Australian Government funding. Ministers do not approve recommended proposals in their own electorate / jurisdiction.

Caveat: Construction start and end dates are the most recent as provided by the proponent
