Public Health (Tobacco and Other Products) Bill 2023

The Police Federation of Australia (PFA) is the national body representing the professional and industrial interests of Australia's more than 65,000 police officers, across all state, territory, and the federal police jurisdictions.

| Membership as at: 31 December 2022 | |
|---|---------------|
| Police Association of South Australia | 4,703 |
| Western Australia Police Union of Workers | 6,880 |
| Queensland Police Union of Employees | 12,177 |
| The Police Association of Victoria | 17,424 |
| Police Association of NSW | 17,020 |
| Police Association of Tasmania | 1,415 |
| Northern Territory Police Association | 1,628 |
| Australian Federal Police Association | 4,040 |
| Police Federation of Australia | 65,287 |

The PFA thanks the Committee for the opportunity to provide comments relating to the *Public Health (Tobacco and Other Products) Bill 2023*.

We have written numerous submissions and appeared before a range of Parliamentary and other Inquiries into issues of serious and organised crime. Our keen interest in this Bill is due to the fact that the illicit tobacco and vape market is growing at an exponential rate and much of it is being controlled by such crime groups. As such, the Government's health policy in relation to tobacco and vapes is being undermined by cheap, often dangerous and unregulated products.

In November 2019 the PFA provided a submission to the Parliamentary Joint Committee on Law Enforcement's (PJCLE) Inquiry into Illicit Tobacco and in December that year appeared before the committee to give evidence. Much of our submission and evidence focused on issues around the lack of enforcement and engagement across numerous federal agencies and states and territories in respect to illicit tobacco sales, the need for a nationally consistent licensing regime for retailers and the greater use of intelligence on those involved in such activity.

That Committee reported in 2020, with strong bipartisan support, via a number of very relevant recommendations, which unfortunately have not been acted upon either by the previous or current governments. That lack of action has seen the sale of illicit tobacco products and now vapes, continue to grow substantially, the funds from which are allowing serious and organised crime groups to carry out further illegal activity including the importation and distribution of drugs.

It is the PFA's strong view that at least two of the key recommendations of that Committee's Report should be acted upon as a matter of urgency.

They are:

- **Recommendation 5**

5.65 The committee recommends the Australian Government explore options to develop a nationally consistent licensing regime for tobacco products, including tobacco product manufacturing supplies and equipment.

- **Recommendation 7**

5.102 The committee recommends the development of a National Illicit Tobacco strategy, in conjunction with state and territory police forces, as a co-ordinated, national law enforcement-led response that will:

- outline the roles and responsibilities of all relevant stakeholders and agencies;
- clearly articulate the actions and stratagems to be implemented;
- include strategies for improved information and data collection and sharing; and
- be published as a subset of the National Drug Strategy, while retaining confidentiality for operational material.

In November 2022, I was again invited to appear before the PJCLE as a follow-up to the Committee's 2020 Report.

At that appearance I again focused on our concern that serious and organised crime was behind much of the illicit tobacco sales in Australia and the proceeds of those sales were driving other illegal activity, including drug trafficking by these groups. That view has not changed over the ensuing 12 months, except that it has become stronger as the rise of illicit outlets has continued to grow, as has the control of serious and organised crime over the sale of such products.

In my 2019 submission I quoted the ATO tax gap for the 2016-17 financial year as \$647 million. The most recent ATO's analysis shows that figure for the 2020-21 year, to now be \$1.9 billion. That figure does not include lost GST to the states, or the loss of revenue for legitimate retailers of legal tobacco products. I also note that in 2021 KPMG estimated that almost 20% of all tobacco consumed in Australia was illicit. As previously indicated, such illicit activity continues to undermine the Government's own health strategies in regard to smoking and has not been sufficiently addressed by either the previous or the current government.

In my 2022 submission and evidence, I again reiterated a number of initiatives that could be introduced to target the substantial increase in illicit activity.

This hearing provides this Committee the opportunity to review the unanimous findings of the PJCLE's inquiry into illicit tobacco and make recommendations to Government about actioning those recommendations.

I am aware, that the March 2022 Ministerial meeting on Counter Terrorism and Transnational, Serious and Organised Crime, agreed to work together to consider opportunities to coordinate enhanced efforts to combat illicit tobacco, including a response to the recommendations of that 2020 Report. Ministers also agreed to reconvene in six months to review progress against the issues discussed and to consider collaborative approaches to other important national security issues. I am advised that the issue of illicit tobacco is again an agenda item on the Police Minister's Council meeting on Friday 6 October.

Throughout the past four years the PFA has continued to advocate for the development of whole of government strategies to support the involvement of state and territory police in targeting retail level sales of illicit tobacco and more recently vapes. Recent reporting continues to indicate that the number of illicit retailers has increased dramatically in that time and a significant amount of violence is currently occurring as serious and organised crime groups compete in the market (see some recent attached headlines in newspaper and other articles). I respectfully suggest, that asking state government health or local council compliance officers to visit and inspect retail outlets with strong links to serious and organised crime is not appropriate.

I pointed out in 2019 that targeting the 'point of sale' transactions of illicit products, would significantly disrupt illicit tobacco sales and by using a licensing regime, if a retailer could not prove the provenance of the product they are selling, then that could constitute an offence under the respective state or territory legislation. I also suggested this could be enhanced by complimentary national legislation.

I further recommended the use of infringement notices, with significant monetary penalties for offending retailers, suggesting it would act as an efficient method of local police intervention and as a real deterrent for anyone thinking of undertaking such sales. Such a strategy would provide a number of positive outcomes, including –

- Disrupting the retail 'point of sale' of such illicit products, including tobacco and vapes, by the introduction of significant monetary penalties for those selling the product;

- Becoming a major deterrent for others contemplating getting into the market of illicit sales;
- Because the fines could be via state-based legislation, any monetary penalties would go to the respective state, thus encouraging them to be more proactive in the enforcement of such illicit activity;
- It would make local police intervention an easier and less time-consuming task; and
- Would be an excellent intelligence gathering tool about the 'point of sale' of such illicit products and identifying who is involved and their potential links to serious and organised crime.

The above suggestions are explicitly contained within the PJCLE Committee's recommendations 5 and 7, as pointed out earlier in this submission.

A fully formed National Illicit Tobacco Strategy would see consistency in enforcement across federal agencies and departments and all States and Territories, in both legislation and policy with clear roles and responsibilities as well as appropriate resourcing for retail enforcement across the Commonwealth and all states and territories. Currently there appears to be no coordination across the various responsible federal agencies and departments, let alone states and territories.

Such a strategy would also ensure that those that are selling illicit products could come under the respective proceeds of crime legislation, thus forfeiting their ill-gotten gains to be used on important crime prevention initiatives that would be of benefit to the whole community.

The PFA has met with Crime Stoppers who have indicated their willingness to be involved in such a national campaign.

As a means of expediting such a strategy and ensuring sufficient resources are available on the ground for retail enforcement, particularly in those states where the illicit retail outlets have taken a significant foothold, the Australian Government should fund state police to be part of Illicit Tobacco Task Force, Strike Teams, established initially in Queensland, New South Wales and Victoria. Such funding could be for an agreed period contingent on the respective state enacting tobacco licensing legislation.

For this initiative to be successful, it would require the support of the respective state governments and their police forces. Noting the outcomes of various Ministerial meetings, and the recent spate of violence between gangs involved in this illicit activity, that proposal would likely be supported.

Together with the above strategies, it is also incumbent upon Government to use its powers to target websites and other social media platforms that are promoting and selling such illicit products, often to underage people. There is a specific role for the Department of Communications in this process, which appears to date, to not have been actively involved in the enforcement of such activities.

I also very recently gave evidence to a PJCLE hearing into Challenges and Opportunities in addressing Australia's Illicit Drug Problem. In that hearing I made the analogy of illicit tobacco and illicit drugs. I suggested that Australia had actually taxed tobacco into making it illicit and that there were far more, generally, law abiding citizens, purchasing illicit tobacco now than ever before, when the taxation policy and health policies were actually trying to restrict people from using tobacco products. I suggested that as a result, we have moved illicit tobacco from a health issue to a serious policing issue.

I respectfully suggest that the intent of the *Public Health (Tobacco and Other Products) Bill* will be undermined and not achieved unless the government has a concerted effort to attack the proliferation of illicit tobacco and vape products currently readily available to the public.

I would be happy to appear before the Committee to expand on any aspects of this submission.

Sincerely yours,

Scott Weber APM
Chief Executive Officer

City's businesses lose 50% of customers to illegal tobacco trade

Toowoomba is awash with chop chop tobacco that sells for a fraction of the price of the legal alternative. It's a price point that retailers cannot compete with and it's driving them out of business.

Revealed: List of Toowoomba stores openly selling illegal tobacco

Illegal tobacco has flooded Toowoomba and the Darling Downs with stores openly selling chop chop to anyone who asks. The Chronicle has been secretly filming their illicit trade and can reveal just how wide spread it is.

VIDEO: \$600,000 illegal tobacco bust at Gold Coast border

A man trying to cross the border has been busted by police with allegedly \$600,000 worth of illegal tobacco in his vehicle. SEE THE VIDEO

Tobacco smuggler jailed for more than two years

A smuggler who illegally imported 163,000 cigarettes in boxes with names such as 'parts' and 'hand catchcry' has been jailed.

Illegal cigarettes racket stubbed out

An Adelaide man caught trying to smuggle 163,000 cigarettes and 85kg of tobacco into Adelaide has denied being the mastermind behind the operation.

Inside Melbourne's booming black market cigarette trade

Smokers desperate to avoid the rising cost of cigarettes are fuelling the black market in illegal tobacco, which is booming in Melbourne's southeast, a Leader investigation can reveal.

Wild plan to stop smoking in Australia

Smokers may soon need a doctor's prescription or pick up their ciggies from the pharmacy in an ambitious new plan to wipe out the habit.

Tobacco smuggler jailed after police sting

A Malaysian woman who flew to Melbourne to get a more hands-on approach to a money-laundering and tobacco smuggling system for a global criminal syndicate has been jailed for her sophisticated crimes.

Inside Adelaide's illegal tobacco trade

Organised crime gangs are believed to be profiting from smuggled cigarettes being sold in nondescript corner stores across suburban Adelaide – while law-abiding retailers live quietly in fear of retribution.

300,000 cigarettes found in raid

Authorities have allegedly uncovered hundreds of thousands of illegal cigarettes and hundreds of kilograms of undeclared tobacco at a home in Melbourne.

Tassie's anti-smoking strategy lauded

ADRIAN Reynolds was uplifted by the reaction from health experts at a major conference in Abu Dhabi.

Youth must butt out

The notion of "choice" to smoke tobacco is balderdash, and the industry clings to it like Super Glue.

FACE & BODY

Smoker? Your future is not pretty

WE ALL know smoking is bad for your health. But have you seen what it does to your face? This is what Rachael Finch would look like if she were a smoker. Disturbing images ahead.

FACE & BODY

Smoker? Your future is not pretty

WE ALL know smoking is bad for your health. But have you seen what it does to your face? This is what Rachael Finch would look like if she were a smoker. Disturbing images ahead.

Law & Order

Illegal cigarettes run hot across city

"DRESS down" was the instruction when the Herald Sun went shopping for illegal tobacco last week.

VIC News

How drug dealers are now targeting our children

Synthetic drugs were outlawed in 2017 but despite the ban these drugs are still freely available at many city adult shops and tobacconists —and even on social media — and they are causing mayhem in the CBD.

Police & Courts

Attempt to smuggle 300kg of meth into Melbourne in surfboards

Two men from Melbourne's south east are facing life behind bars after police allege they attempted to smuggle 300kg of meth into the city, hidden inside surfboards.

Tim Smith, Will Fowles water down the wine at Scotch College

Scotch College has produced a list of political powerhouses the likes of Cain and Kennett, but in recent years its contribution to Victorian parliament has been a bit of a car crash.

North West

White collar crims caught breaking the law

In a world of professionals who embody integrity and excellence, there exists a shadowy underbelly of individuals who have recently been making headlines for all the wrong reasons.

Cairns

217 suburbs where illegal vaping operators do roaring trade | MAP

Southeast Queensland's vaping black market is unlikely to be stubbed out under proposed new federal laws, according to research from one of the country's peak retail associations. Check the map of suburbs where illegal traders are operating.
