

---

To whom it may concern,

I support the "Health Insurance (Certain Types of Abortion) Amendment Bill 2013" because of the following reasons:

- any child, born or unborn should not be discriminated against based on their sex, particularly when it comes down to the decision as to whether they live or die
- it is not right to take funding for legitimate Medicare benefits and use those funds to terminate children because of a sex preference
- as has been seen in history and throughout the world, this policy will lead to females being terminated in favour of males, which will lead to an imbalance in society and many social problems that come with that imbalance

I personally find the line of thinking that would permit and then finance the abortion of children for any reason repulsive, violent, destructive and abhorrent.

Regards

Matthew Prince
