

Why have Brussels and Geneva Banned the 5G Wireless Mobile Network Rollout? ~~ CAPT Graham Bates ADM ~~ 22nd October 2019

5G Is The “Stupidest Idea In The History of The World”- Washington State Biochemistry/Medical Science Prof

Published 3 months ago on February 19, 2019
By [Arjun Walla](#)

Source: [Global Research](#) – 25th April, 2019

This report emphatically proves that 3-5G wireless mobile telecommunication networks cause lethal pathology. It also confirms that Australians have no protection from a conflicted, comatose and complacent health bureaucracy.

Source: [International Appeal to Stop 5G on Earth and in Space](#)

Attached are two comprehensive PDFs about the lethal 5G network rollout. They provide references, including short You-tube videos covering the effects of Electromagnetic Radiation [EMR] spectrum, specifically, millimetre microwave irradiation from 2G – 5G technology that causes cell mutations, cancer and death.

5G Wireless Technology Is War against Humanity

By [Claire Edwards](#) Theme: Science and Medicine, United Nations
Global Research, June 03, 2019

A² 

This article was first published in February 2019.

Disclosure about 5G — and its considerable risk for humanity — is occurring within the United Nations. This is thanks to longtime UN staff member and whistle-blower Claire Edwards, who recently contacted me with this powerful story which touches all of humanity and our shared future. Watch the interview above, or on YouTube [here](#) or on Facebook [here](#). — Josh del Sol Beaulieu

The first eight months of WWII with no fighting was called The Phoney War. Using millimetre waves as a fifth-generation or 5G wireless communications technology is a phoney war of another kind.

This phoney war is also silent, but this time shots are being fired — in the form of **laser-like beams of electromagnetic radiation (EMR)** from banks of thousands of tiny antennas^[1] — and almost no one in the firing line knows that they are being silently, seriously and irreparably injured.

In the first instance, 5G is likely to make people electro-**hypersensitive** (EHS).^[2] Perhaps it was sitting in front of two big computer screens for many of the 18 years I worked at the UN that made me EHS. When the UN Office at Vienna installed powerful WiFi and cellphone access points — designed to serve large, public areas — in narrow, metal-walled corridors throughout the Vienna International Centre in December 2015, I was ill continuously for seven months.

Source: Claire Edwards — former [UN staffer in Vienna](#), Austria

Claire Edwards graduated with a BA Hons, MA and worked for the United Nations as Editor and Trainer in Intercultural Writing from 1999 to 2017. After collecting evidence that UN workers in the Vienna office were becoming sick from wireless mobile phone irradiation, she publicly notified the UN Secretary General. When her warnings were ignored, she joined up with [Arthur Firstenberg](#) to publish the International Appeal to Stop 5G on Earth and in Space (www.5gspaceappeal.org) in May 2018. The Appeal has attracted over 30,000 individual and group signatories from 100 countries.

Note: Some documents refer to wireless telecommunication as Electromagnetic Field **[EMF]** exposure. This is synonymous with Electromagnetic Radiation **[EMR]**

These PDFs cover vital topics, including;

- * Differences between Non-ionizing and Ionizing radiation
- * How 5G acts as an Ionising radiation,
- * How Ionizing radiation creates free radicals within human tissue,
- * How **EMR** & free radicals can break our DNA chains,
- * How DNA fractures cause human cell mutations - leading to cancers - and cell death from constant and continuous irradiation of humans.
- * How unleashed 5G will decimate our population.
- * This 4th October, 2019 update by Claire Edwards, entitled [5G Cell Phone Radiation: How Telecom Companies Are Losing the Battle to Impose 5G Against the Will of the People](#) — provides a comprehensive reference.

Synopsis

1. Testimony from [Claire Edwards, Editor and Trainer in Cultural Writing for the United Nations](#) [1999 - 2017] about how 3 or 4G mobile phone technology is making UN employees sick.

Comment: The UN Secretary General appears quite unconcerned about the 5G threat. [Claire Edwards](#) [former Vienna based UN staffer] states that she tried for more than 2 years to alert the UN authorities. As at June, 2019, her efforts are still deliberately ignored.

2. Excerpts from a 2016 speech by then [US Federal Communications Commission chairman, Tom Wheeler on how 5G will be driven into the marketplace](#) without any studies on possible health effects.

Comment: This speech is simply terrifying!! The US FCC is facing many lawsuits as per this June 2019 list – [FCC lawsuits](#).

3. [Australian neurosurgeon Dr Charlie Teo details how brain cancers are the No 1 cause of mortality in children](#), costing billions of dollars and heartache across the planet. He also explains how some of his patients were exposed to occupational massive EMR doses by mobile/cell phones and perished.

Comment: Dr Teo's interview provides compelling evidence about potential EMR health risks.

4. Dr Martin Pall, Professor Emeritus of Biochemistry and Basic Medical Sciences ~ Washington State University. [The 5G Rollout is Absolutely Insane](#).

Comment: Professor Pall has a complete grasp and depth of knowledge about EMR that is unsurpassed.

5. Hardcopy -- [54 pages in PDF by Professor Martin Pall in his original document to the European Authorities](#) about the dangers of 5G.

Comment: Note the massive reference list provided by Prof Pall.

6. Copy of letter from the Australian Radiation Watchdog - [Australian Radiation Protection and Nuclear Safety Agency \[ARPANSA\]](#) - to Ms Tanja Price date 18 DEC 2018, refuting any links between mobile phone use and brain cancers;

"Epidemiological studies on links to cancer ~ A major ARPANSA-led epidemiological study has recently been published with the British Medical Journal Open, which found no link between the use of mobile phones in Australia and incidence of brain cancers. The study compared the incidences of brain cancer in Australia from 1982 to 2013, to mobile phone use during the same period.

The study found that there was no increase in brain tumours that can be attributed to mobile phone use.

This study was completed in conjunction with The University of Wollongong, Monash University and the University of Auckland, and is available online at <https://bmjopen.bmj.com/content/8/12/e024489.full>.

With regard to the recent study by the [US National Toxicology Program](#), this study investigated RF EME at high levels (mostly above current standards) that are not relevant to mobile phone base stations which emit RF EME at a fraction of the ARPANSA RF standard."

Comment : Clearly ARPANSA chooses to ignore the testimony and experience of medical

practitioners like Neurosurgeon Dr Charlie Teo and the massive evidence trail provided by Prof Martin Pall, and [others](#).

7. Professor Martin Pall publicly "*slams the above mentioned ARPANSA response to a letter from a petitioner from Stop 5G Perth and Australia wide*" group.

[Here is Prof Pall's 28-page forensic analysis of the ARPANSA response.](#)

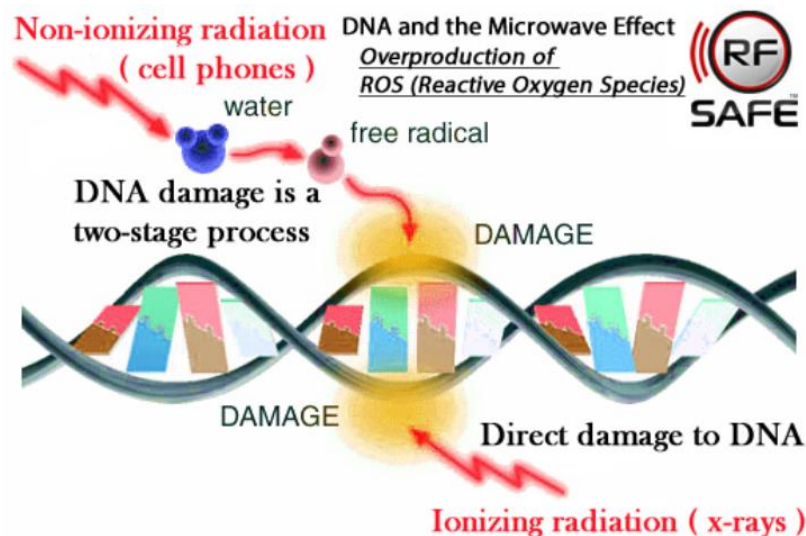

Comment: Prof Martin Pall soundly counters the casual and carefree opinion/s of ARPANSA in his rebuttal.

8. How ARPANSA got it so Wrong!

Below: This is the traditional *[prevailing]* paradigm for the Electromagnetic Spectrum.

Below: The new paradigm whereby Non-ionising radiation displays the same effects as Ionising radiation.

Source: [DNA damage from mobile phone](#) microwaves – RF Safe

This article by [RF Safe](#) details the two-stage process where microwave irradiation acts just like X-rays, ionising atoms & molecules by displacing electrons, enabling formation of free radicals. The prevailing *[traditional]* view that non-ionizing cell phone radiation cannot

cause DNA damage was first challenged academically with a theory Penn State published titled, [DNA and the Microwave Effect, January 20, 2001](#).

[In 2014, new studies](#) on (ROS) Reactive Oxygen Species Production and RF, validates the Penn State research and cell phone radiation does cause DNA damage in two-stage process.

Comment: A new paradigm has clearly been established. ARPANSA should have been monitoring all research about microwaves. They have now exposed the Australian public to widespread, continuous and unregulated DNA damaging irradiation.

9. The [City of Brussels has banned the 5G network](#).

[Geneva has also blocked](#) the 5G rollout.

[US cities are also pushing back](#) against 5G deployment.

There are confirmations about this amazing news items from other agencies below;

From [Greenmedinfo](#)

From [World Health.NET](#)

From [Global Research](#)

[Brussels is the capital of Belgium](#). It is a sophisticated city and is the home of the EU.

If the [EU Parliament has fallen into line with the decision of the Brussels City Council](#), then this should be **ringing alarm bells in the Australian Parliament too**.

Comment: Perhaps the letter sent to the EU authorities by Prof Martin Pall convinced the Belgians that 5G is too dangerous for their people.

10. The prestigious [Lloyds of London Insurance Group refuses to cover 5G wireless mobile illnesses](#).

Lloyds Insurers Refuse To Cover 5G Wi-Fi Illnesses

Published on February 12, 2019

Written by phibetaiota.net

Source: [Lloyds refuse to discuss](#) their new EMF exclusion clause

"The Lloyd's of London and its underwriter CFC Underwriting Limited exclude any liability coverage for claims, "directly or indirectly arising out of, resulting from or contributed to by

electromagnetic fields, electromagnetic radiation, electromagnetism, radio waves or noise.”
(Exclusion 32, page 7)

EXCLUSIONS

We will not

- a) make any payment on your behalf for any claim, or*
- b) incur any costs and expenses, or*
- c) reimburse you for any loss, damage, legal expenses, fees or costs sustained by you, or*
- d) pay any medical expenses:*

GENERAL INSURANCE EXCLUSIONS:

32. Electromagnetic fields

directly or indirectly arising out of, resulting from or contributed to by electromagnetic fields, electromagnetic radiation, electromagnetism, radio waves or noise.”

See the full PDF document: [INSURANCE FOR ARCHITECTS & ENGINEERS – ProSurance TM A&E Policy Document – Lloyd’s 2015](#)

Another of the world’s largest insurance companies, [Swiss Re](#), has recommended to other insurance companies to write in exclusion clauses against paying compensation for illnesses caused by continuous long-term non-ionising radiation exposure. The recent Austrian insurance company [AUVA report](#) confirms DNA-breaks caused by non-ionising radiation.

Source: [Beyond Radiation](#) blog by Mikko Ahonen, PhD

Comment: This should completely stop the global rollout of 5G. Consider the implications of other insurers following the Lloyds of London precedent.

10. [Telecom and Insurance companies warn shareholders about future financial risks from EMR.](#)

Comment: This further confirms the significant health risks from EMR exposure as per the [2011 classification by W.H.O. of wireless EMF as a 2B carcinogen.](#)

Analysis

This compelling intelligence proves, beyond reasonable doubt, that any government, political party or agency that continues down this lethal 5G path is at risk from;

- A. Massive lawsuits by individuals or groups who fall ill from EMF or EMR exposure.
- B. Extensive backlash from voters/electors who feel betrayed by a Govt that clearly ignores the mounting evidence that 5G is an existential national threat.
- C. The likelihood of Civil Unrest caused by widespread irradiation is unlikely to have been assessed by Australian Intelligence assets as ARPANSA has dismissed the 5G threat.
- D. Australian and State/Territory Parliamentarians should awaken – there are significant numbers of wi-fi broadcasting nodes within the Australian & State/Territory Parliament Offices, just like the UN. Why would MPs, Senators and their staffers be complacent in risking their own health & lives as guinea pigs for overseas corporate entities, determined to make massive profits, irrespective of the lethality from this technology?

E. The potential impact upon our hospital and healthcare systems from a 5G irradiation epidemic has NOT been risk managed. When Lloyds refuses to cover health risks from 5G, this will flow on to all insurance underwriters and the health insurance business. How will our Medicare system continue to operate with DRGs [Diagnostic Related Groups] of irradiated patients

Summary

The 5G network is an existential threat to the security and safety of the Commonwealth of Australia.

ARPANSA is our primary guardian for radiation security. Why have they completely failed in their [Duty of Care](#) to their fellow Australians, by not even *considering* the possibility of critical health issues from 5G technologies?

They also flatly deny credible evidence of serious illnesses caused by earlier 3G and 4G technology.

This lapse is most concerning, especially given the evidence that other nations are setting [very conservative exposure limits to RF and millimetre microwave](#) broadcasts.

Recommendations

1. Download and save these reference You-tube videos, in case that they are one day deleted from the You-tube servers. This information is compelling evidence that 5G is a lethal issue.

There are currently several [Australian petitions](#) underway to stop the 5G rollout.

Should the 5G topic be raised by anyone during the election campaign, blowback from this ARPANSA failure may implicate the current government, simply by association.

Refer to the ARPANSA response document in Serial 6 - above.

2. The government have provided no contingency plans for discussion when this threat materialises.

3. The only option is to stop the 5G rollout before it is too late.

4. Australia was once known as The Clever Country. Recent bans on 5G by communities including Brussels and Geneva are clear indications that Australia is not such a clever place after all.

Kind regards

CAPT Graham Bates ADM
