
I am submitting my support for this bill as I do not support Medicare funding the termination of foetus due to their gender.

There is significant concerns in developing countries about state sponsored gendercide and the negative demographic consequences.

Typically it is the female foetus that is selected for termination. With the advancement of equality for females gained after a lot of battles, its surely important that the female gender is not exposed select abortion.

I support the bill to remove funding for abortions based on gender selection. It is important to our healthy community that gender isn't a determinate for success or life but rather your involvement and contribution in the society.

Regards
Nick Williams
