

Submission to Trade and Foreign Investment (Protecting the Public Interest) Act 2014

I am terrified of the implications of the Investor State Dispute Resolution hidden in so called free trade agreements.

I totally support protecting Australian laws by banning ISDS. Our health, environment, worker's rights etc is too important to allow corporations to be able to sue to overturn.

Australian parliament please ban ISDS from current and future Free Trade agreements and protect Australian Sovereignty.

1. Please confirm receipt and keep me informed of progress.
Regards

Robyn Wood
