

Hi,

I am not sure if this is an issue but to me personally as we have had no pay increases occurred during the last 3 years this has impacted heavily on my Superannuation contributions being at the same pay level we are now behind by 7.5% pay increases. That is if we were to get a 2.5% increase for each year. This will affect my pension in the long term.

At the agency level, we are being push to our limit by management, but they are constantly saying do more with less. That is all right for them to say but the work is not decreasing it is increasing all the time. This is now starting to affect my staff health as we are constantly asked to take on more work and no extra resources.
