

5 April 2013

To everyone that this will concern,

Laws to be passed by the senate,

Csg mining shall only be dealt with by federal government.

Csg mining shall never be done in anyone water catchment where it will contaminate drinking water. Nor shall it be done in or nearby a national park/ environmentally protected area.

The peoples voice should be heard, if the majority of a community say NO to Csg mining in their region, DO NOT proceed!

We are the people of Australia, we chose who will govern our land!

This is on behalf of my wife, children and myself.

Kasper Hagen.

Be proud of what you have done for the earth in your life time.
