Subject: Nuclear Waste Dump at Muckaty Station
Date: Friday, 5 March 2010 8:02:49 AM

Dear Sir/Madam,

I despair at our society and its values. We should not be creating the waste in the first place, let alone dumping it.

I would urge you not only consider finding a site that will not affect anybody (unlikely, granted) but to ask governments to educate the population to take better care of themselves and thus the planet. I.e. Our greedy, indulgent society *overeats the wrong things, requires neclar medicine.

*believes that consumerism will give us happiness and its byproducts are not connected related.

Thank you,

Heather Hunt

ps I'm looking to permaculture and self sustainability to replace our current lifestyle.
