

Submission for compensation statement. Orphaned since 1969-82 at Colac St Cuthbets Home in care as a state of ward of victoria. Since the age of three I was apart from my family home and loved ones. Devestated to find no way out I used to run and hide . I would suffer in silence fearing being abused weighed heavily on my shoulders being scared of people in authority reflecting on my treatment from st cuthbets. Trauma and flashbacks are often a reminder that                      did enjoy punishing me something that was done thoroughly over many years in private circumstances. What I would like to happen is salvation from the past and to be able to accept those past experiences and live to see out a happier outcome for me. I Know how people in the world suffer loss generally and I know personally loss of family is far more destructive for the survivors going on in life without them hurts a lot. I long to live in my house and have my family visit me in a less stressed attitude hopefully one day soon I hope so. I cant change my past but my future is something I am still working on and need help if I am going to enjoy it.

c/o. William Baker
