

It's high time we started using environmentally friendly power, water is one of our basic needs, destroy that and what is left? Stop lining the pockets of greedy people, think about our future and our children's future and their children and so forth. CSG is the worst mistake possible, it must stop! It makes me sick to think in this day and age this sort of plundering can go on, Wake Up! Please Wake Up!

Yours in Truth

Jacquelyn Harris.
