

James Constable.

**Senate Finance and Public Administration Committee
PO Box 6100
Parliament House
Canberra ACT 2600
Australia.**

Dear Committee Members,

Re: Impact of native vegetation laws & legislated green house gas abatement & Climate Change measures, on landholders.

Land values have devalued on undeveloped land.

Some of our land has a covenant put on it, so nothing can be done with it but we still have to pay rates, public liability insurance, maintain fences, control vermin, pigs, foxes, Noxious weeds.

Due to the locking up of forest & farmland towns have died & are dying at a rapid rate.

Climate change is disputed daily. It is not a science these days it is a business.

Repeal Native Vegetation laws, acts, regulations, otherwise governments to buy & compensate, landowners.

There is no money or biodiversity in unmanaged land.

With the native Vegetation act at the moment we are destroying our environment (eg, bushfires, Flora & Fauna starve because timber is to thick for food sources to grow) etc.

These laws put a burden on landowners to work their land profitably & sustainable.

Our forefathers fought in wars to keep this country free & fair.

A DEMOCRACY!!!!

Yours Sincerely,

James Constable.
