

Please be aware that I believe this bill is essential to the health and welfare of the Australian Community in total.

This may help to keep our agricultural and health industries honest (or encourage a little more honesty at least?!) )

The people that stand to benefit from this bill going through is **all of us**.

The only 'people' who wouldn't benefit - are conglomerates who have enough money and power as it is - and can afford to have a little less of it for the sake of humanity!

Joanne Mulcahy
