

Environment Protection and Biodiversity Conservation Amendment Bill 2013 [Provisions]

I believe that the amendments to the EPBC should be accepted and passed in their current form. This will provide a solid framework for people in their fight to protect their land and environment against CSG and protect valuable water resources. Depletion of groundwater is a critical issue of which all Australians should be well aware. On behalf of the Caroon Coal Action Group which represents some 200 farmers on the Liverpool Plains we welcome these amendments and thank you for the opportunity to make this submission.

Kind regards

Mrs Rosemary Nankivell

Chairman of the Coal Seam Gas Committee, Caroon Coal Action Group
