Submission - Galilee Basin (Coal Prohibition) Bill 2018

I put on the record that I fully support the above Bill.

The latest IPCC report has stated clearly that we have only a handful of years to drastically reduce Australia's and the world's carbon emissions. Now is not the time to open new coal mines. The proposed Adani Carmichael Mine and the other proposed coal mines that would follow on from the Carmichael Mine must not be allowed to start-up.

Stopping the opening of the Galilee Basin is for the benefit of the planet's climate.

I strongly support this Bill proceeding.

The Adani Carmichael mine and other mines in the Galilee constitute a giant carbon bomb and must not proceed.

Yours faithfully

Gillian Reffell
