

As a small investor in a project that will reduce reliance on brown coal and the like think it is time that our voice was heard

Am also chronic asthmatic so the less fossil fuels burnt the better

Time we had full economic pricing so adverse impacts e.g. polluted air were costed into all energy and government projects

Let's make a small difference and let this turbine be built

It is run and supported mostly by locals – one of my colleagues from Melbourne was a founder member

Ingrid Radford
