

Dear Sir or Madam:

How are you!

My name is jimmy; I and my fiancée have been stay in Australia for 7 years since our high school (sunshine coast, 2003). After 5 years University study, we both successful graduated from Griffith University bachelor and Master degree with major in computing.

After our uni life, I found a good job work as a digital designer/ web developer and then we decided stay here, because we love Australia and this is our second homeland, so we lodged 885 visa applications on July 2009 and also we been told we could wait at least 2 years. Anyway, we are patient to wait.

In October 2009, I and my fiancée invested 150,000 AUD set up a digital product shop in Brisbane CBD, our business is very good, we have paid nearly ten thousand oz dollar tax for government in last six month and also we have two local girls ( both are Australian citizen) work full time for us.

Recently, I am plan to make a new investment on Australian grape wine export Industry and also plan to buy my first house in Brisbane. However, we could have many problems without a PR. I have considered to make a new apply for visa 163 business Investment visa, we both would like to make a contribution for this beautiful land , but my lawyer told me my age is too young for this visa.

Recently, I ve heard about the law is intend to change, and our application could get cancel, this is unfair !

Dear sir or madam we have spent most valuable time of our life in this country, we love this country, and we had many friends from church, work place and my business partner, they support us to stay here. we are here to make contribution and not bring the trouble for government, we feel unhelpful and I dont konw what we should do in next step, so please pay more attention to peoples like us.

Best Regards

Jimmy
