

## Wild Horses Kimberley Inc. 2

These photos show how wild horses protect their environment.

Horse tracks showing the one line nose to tail movement of the herd.

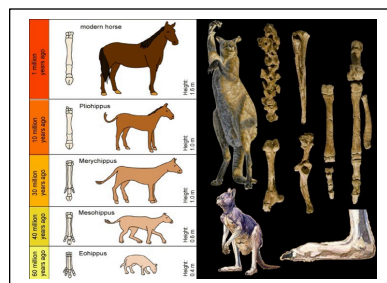

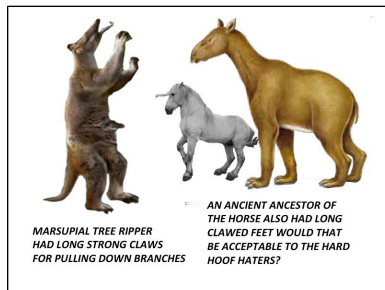

Track showing how horses use man made tracks.

Tracks through reeds for other wildlife to access water

Drinking spot at the stream showing only one spot used for access by horses

Track showing regrowth on horse track.

How horses are related to our ancient wildlife

Pug holes for tadpoles

Evolution of the horse

Wild horse movements showing how they form firebreaks.

(domestic horses have lost this ability)
