

8-3-10

Ms. Julie Bennett,  
Committee Secretary,  
Senate Legal and Constitutional Committee,

Re - Nuclear Waste Dump.

I wish to express my concern that Muckaty Station may be used as a national radioactive waste dump. This remote place is too far from centres of production, and would mean transportation of dangerous material not only over long distances, but through the private properties of many people.

Has there been consultation with the traditional owners. I would suggest that the committee must consult with them, and face to face.

Yours sincerely  
(Ms) Juleyn E. Gray.
