Carol,
I am looking for clarification on school projects. At the moment Hallam Valley Primary School (enrolment 418) is a Round 1 school and the building of a gym is about to commence. At the time of application the Hallam Valley School community was keen to also have a standalone library facility. At the regional meeting it was documented that the school were happy for a full size gym and were looking to use the remainder of the grant allocation to build a library. The templates provided were not suitable as they included classrooms that would put us as over entitlement. The school community has since had plans drawn up for a library and they are keen to see this project come to fruition. We believe from Anthony Bryne's office, that a procedure for companion projects is being drawn up and from our information, our library will fit the criteria. The VPA has informed Principals that schools may do up to two projects to get near as possible to their allocation. Southern Region have a different story. It seems that the process is not transparent and inequities appear to be occurring in allocation between local schools. Could you please provide us with further information to clarify this situation so we can begin preparatory work on the library project with the architect, if all funds allocated to our school are made available. I look forward to hearing from you soon.

Regards
Debbie Pejkovic
Principal
Hallam Valley Primary School.
