

Answer to question on notice to Mr Wayne Bayne, Divisional Chair, Coral Sea Access Alliance

**Question** (*Proof Committee Hansard*, 13 May 2011, p. 36)

**Mr Bayne:** CSIRO are not the only science available on this. I have spoken to many different people on it. That is issue number one. Issue number two is we have heard from people like Dr Diggles and those sorts of people who are not only marine biologists, they are also users of the resource and users of the area. I am a practical person; I run a marine business and I use this area on a regular basis. I have a lot of documentation on the scientific issues that affect this area.

**CHAIR:** If you have lots of documentation would you like to maybe give us a list of the documents?

**Mr Bayne:** I will gladly provide you a list of the documentation, copies of it and electronic copies, absolutely.

**Answer**

1. Entox National Research Centre for Environment Toxicology, *Monitoring of organic chemicals in the Great Barrier Reef Marine Park and selected tributaries using time integrated monitoring tools (2008-2009), Reef rescue marine monitoring plan: Projects 3.7.1b, 3.7.2b, 3.7.8, Final Report*, March 2010.
2. Dr Matt Landos, *Airing the dirty agrichemical laundry- fish mutations and fishery decline* (presentation).
3. Dr Walter Starck, *Extraordinary claims in Great Barrier Reef Assessment Require Evidence*, 17 March 2010.
4. Biography: Dr Walter Starck.
