

---

For as long as you our governors pay at least lip service to the Commandments of God, we ask that you not facilitate the destruction of the weakest of God's creations, unborn children, to satisfy the desires of others for a child of a particular sex; desires that have nothing to do with taxpayer health funding. We are glad to have some of our working day sacrificed to help infants struggling in hospital to survive, such as premature babies in neonatal Intensive Care Units, or unborn children who receive transfusions or other medical interventions whilst still in utero. We therefore support the removal of Medicare funding for sex-selection abortions.

Steven and Fotini Kalfas.
