

Submission to Health Insurance Amendment (Medicare Funding for Certain Types of Abortion) Bill 2013.

From Steve McNeilly

23rd April 2013

Medicare funding should not apply to abortions carried out because the baby is the non-preferred gender of the mother/parents. At best, this is an elective procedure that can in no way be considered necessary. At worst, it is an assault on human life. Children are not commodities to be selected or otherwise obtained for the benefit of others.
