

To whom it may concern,

I am disgusted by the Australian Government's decision to lift the live export ban and demand that it be reinstated immediately.

I also support the passage of the Live Animal Export Prohibition Bill and the Live Animal Export Restriction and Prohibition Bill to put a permanent end to all live animal exports.

I also recommend that an Australian Animal Welfare Council be established to provide accurate independent advice on animal welfare matters as the current Government has obviously allowed the inhumane treatment of animals to continue for a number of years.
