Question on notice – Commonwealth Scientific and Industrial Research Organisation

Question

1. What were the various emissions figures produced by CSIRO modelling on the future potential abated and unabated emissions in the Middle Arm Development Precinct industrial development scenarios?

Answer

CSIRO is undertaking research on this topic, however the project is still underway and results have not yet been published.

The research is currently due to be completed by the end of July, 2024, when the project is expected to report its findings. The results are anticipated to be publicly available.
