To Hyperbaric Health Wound Centre
Brunswick Private Hospital - Brunswick

I would like to add to my compliments to the Hyperbaric chamber that I had the opportunity of being involved in it. The treatment that I received for the 30 visits, that it proved to me for the ulcers of the procedure on my left ankle, when I first noticed what was to happen the bubble was placed on my head the bubble was made of plastic and then sealed around the neck, to which I sat for 2 hours.

I am now receiving treatment for the ulcer on the ankle of the left leg which is healing nicely. The staff which do 2 dressings (MONDAY AND THURSDAY MORNINGS) a week on both legs. The ulcer which is the smallest is on the right leg (CALF).

The staff are very helpful, and Martin (THE DOCTOR) and Stie who operates the controls at his desk is great.

Yours Sincerely,

I hereby authorise Hyperbaric Health
to release photographic files of my wound
