

8 April 8, 2013

Honorable Senator,

May the peace and grace of God be with you.

I, as a local pastor in Sydney, believe the Policy for making fund of Medicare is to improve and to help the live to have a secure life. However, though I do not have much knowledge about health policy, I felt so sorry as I read the Health Insurance Amendment (Medicare Funding for Certain Types of Abortion) Bill 2013 which look allowing killing a precious lives though they do not have chance to breath a single breath on earth which they already are living.

Life is not an existing manufactured one but the living and precious creation. The bill is not about to give a better life to whom have stress and pain because of babies but a support to give a killing permission to those who should give life to people.

Please consider deeply about the bill and make a right and just decision.

Bless you,
