Dear Sir/Madam,

I am writing to inform you of my opinion on Wind farms. I am all for this type of renewable energy for the future. It has to be better than the emissions that are put in the air by coal power stations. Our grandchildren will be the ones to benefit from better living conditions. I think the appearance of wind turbines is very pleasing to the eye and are no more unsightly than power Transformers and power lines over the countryside.

Yours Respectfully.
Amy Linke.
