Re Submission for the Social and Economic Impact of Rural Wind Farms

Dear Senators,

I write in support of rural wind farms.

I understand that wind farms represent the most economic way of producing clean and renewable energy.

I have been close to many wind turbines in Germany and I do not find them noisy nor obstructive.

I actually like the look of them, but I realize that the visual aspect is a very personal issue subject to every individual's perception.

I believe that wind farms support the rural communities by way of employment, taxes and other wider community benefits such as accommodation, meals, petrol etc being purchased by developers, contractors and operation and maintenance people.

Yours sincerely,
