

Live Animal Exports Must Be Permanently Stopped.....No waiting for things to improve.....It will Take Countries Like Indonesia and The Middle East

Many years to Learn.....(It has Taken us 700 Years And we are far from Perfect even Now)
...I am not usually a Labour or Green Voter...But in this Case they are 100% Correct. Julia Gillard has done a Great JobI know there will be a lot of Disruption for a while.....And the poor Cattle Will suffer again...The Farmers will need help to First settle everything Down

But in the Future We Need To cut down the amount of Cattle to about 25% of The Present Number.....All Cattle in Australia Should Always be Slaughtered Using only

Our Own Superior Methods...No other Methods to be used.

The Frozen Meat should Only be Sold to a few Chosen Countries.....Friends of Australia....If This Trade Gradually grows then More People will be employed in Australia and the amount of cattle could increase again....Farmers Will Have to be Compensated and be Helped to get into growing Different Crops that they can make a profit at...We Should Always Fully Support all our Farmers and Food Growers...We never want to see People Pulling out Fruit Trees Again

We need a System where the Local Growers will always be able to be Profitable

(Brains need to be used to Somehow give the Local growers an Advantage)

Think about This Subject....Remember. .Permanent Stop To All

Live Exports.....No Going Back... NowOnly Frozen Meat Prepared Our (Superior) Way.....
