

Environment Protection and Biodiversity Conservation Amendment Bill 2013 [Provisions]

The long term protection of our environment must be far more important than the short term economic benefits some CSG mining will be reaping out of the destruction of our artesian waters, our farm lands, the pollution of our rivers and the destruction of our communities and their milk, tourism and wine production ventures among other sustainable commercial activities.

Australia, of all places DOES NOT NEED CSG energy. We must invest in solar, wind and other non-pollutant clean energy sources. Let's not go down as the 'stupid country' that missed its chance in setting a world example in protecting our aquifers, rivers and lands. To let the CSG mining lobby direct government policies will not only be foolish, it will be a crime in my view.

Come on, we can do it and do it right! Say no to CSG!!! We don't need it, we do not wanted.

Yours

Dolores Neilley
