

To whom it may concern,

I find that I am one of many who find this practice abhorrent. Neither I nor they will vote for or support any party or government that in this “ catalyst “ case refuse to listen to us. There are many things that are so wrong and badly handled, without public agreement Wanton cruelty is not an Australian norm. Have we so deteriorated that it will be? Has anyone in Canberra actually watched these cattle die ? Please don't pass us off as cranks We are your bread and butter

Do not allow live animal export to continue. open abattoirs here with Halal trained staff and operated in a humane way, keep the work at home. Give the cattle , sheep goats whatever at least a place to die that is not swimming in the blood of what they know are their kind and remove the smell of death from this whole issue

Yours in expectation Ann McMaster
