...being named in the bottom 60% league table will damage the reputation of school and their students

...being named in the bottom 60% league table will have a negative impact on our students

...being named in the bottom 60% league table will have a negative impact on teachers in these schools

...NAPLAN results not present an accurate picture of school performance

...the schools that we were compared to on the My School website were not all similar to my own

...public comparisons of school results on My School will lead to greater emphasis on preparing for the test to the detriment of other areas of learning

...I'm concerned nothing had been done to stop league tables being created using the NAPLAN data published on My School
