

An utter piece of unprofessionalism, this comment is not for any dignities of the party debating on the topic. This is an appeal to the people who believe in professionalism.

A request to the MPS debating on this issue, please do consider the decision taken on the agenda will have serious aftermath , onto the professional which are involved in the strategic decision making and contributing to the Australian economy.

Please consider that these professionals are also assessed in GSM categories.

This Expression showed by the Government will have serious after math in coming days As this expression will lower the productivity of the Australian economy.

The morale and pride of the Permanent Residents, Australian Citizens, and Students will be affected terribly and also this will bring the Australian economy down with almost 33.18%.

Today student's studies are at question, so are the Australian education institutions.

Thanks
