

28/03/10

Hello,

I attended a four day course in which I received a Home Sustainability Assessment Certificate (no.11711). I found the course very interesting, personally rewarding and an environmental eye opener. I did receive a HO56593 number on the 4/2/10, completed the Federal Government Contract and mailed it on the 8/2/10 and up till now I have not received a user no so that I could complete the assessments. This is very frustrating as I'm willing to do whatever is necessary to continue with Home Sustainability Assessments. I have a genuine interest in home sustainability, carbon emissions and water conservation. I am hoping that my user number will be sent to me so I can participate in something I consider important to myself and the environment. I have helped numerous people in and around my area in saving energy and recycling in their home, privately, free of charge. I do think that commercial industry is as important to assess as residential environment as I have worked in that area all my life and I witness a gross amount of carbon and water mismanagement.

I'm proud to be part of this scheme. I hope that I will receive all criteria necessary to carry future assessments.

Regards

James Watts.
