

Hi

I am really concerned with the rules coming up as they are really affecting the students who have completed their studies and likely to lodge applications. They have done their assessment, health checks and police clearance and paid huge amount of fees to complete their studies and reach the stage to apply for migration.

As far as my opinion the rules should not be made strict as already there are rules which have been applied since the beginning of this year and students are already struggling to get the pass mark. I think the notices which are being updated are just frightening and totally unacceptable.

If the migration are in a position to change rules they have no right to apply on students which are already in the country and been for 2- 4 years as they have finished studies and got good jobs they can't just cease files and tell to leave the country. The migration rules should be courteous to international students as they came to study and visit the country and under no obligation the right should be taken from them.

Students who recently came on student visa are being affected and make them go nowhere as it takes too much time to get visa approved, file paperwork and booking, medicals and many more approvals to go through and come to the country. The immigration should be providing refund for all of it if they will likely to apply rules on students. Immigration should be made courteous to all and not put strict rules to go through a stage.

The rules should not likely to change as it will affect overseas countries and it have really bad image for travellers as well as other migrants to visit and stay in the country

Please I request to look into this matter and keep rules loyal to everyone.

Thanks
