

Dear Mr Senator

I am writing this on behalf of all the existing applicants who have applied for permanent residency and are waiting the outcome with anticipation. This bill will kill all their hopes and plans they have made for their future. It is complete unfair because many international students are also among the applicants. They have paid huge amount of fee and are waiting for their residency so that they can start a career because on bridging visa no good employer wants to touch you. Moreover, if they could go back they would not have applied for the residency on the first hand, and now when they are so many years behind their fellow countrymen, you cannot expect them to start from scratch and have a bright future. This bill will spoil the reputation of this county and will be a black spot in its history. People have already lost lot of faith with the recent changes being made on such a short notice and this bill will destroy the remaining. All I want is to request you to stop this bill which is purely injustice and against humanity. You will be playing with thousands of lives if it is passed.

Million thanks
