Subject: Submarine Rotational Force

As a Shoalwater resident I am concerned at the lack of community consultation in regard to the Submarine Rotational Force's presence in the Rockingham area. To bring 700 US service people into an acute housing shortage is ill-advised.

I have only just heard that the proposal was open for public comment.

The wider concerns about the accommodation of nuclear submarines at Garden Island has also received little publicity. To describe the waste from nuclear submarines as being akin to the low-level waste produced from nuclear medicine doesn't seem right. Indeed hard facts about the entire project seem to be missing.
