

I wish to make a submission on the live animal export trade

It should not be permitted for the following reasons:

- 1) the animals suffer severe distress when they are transported, often for long road journeys and then by sea.
- 2) it is our duty as producers to ensure the welfare of our products.
- 3) if we would not allow our animals to be treated badly in Australia we cannot allow them to be badly treated elsewhere.
- 4) as we humans have basic human rights, so animals should have basic animal rights and these apply world wide.

Yours sincerely

Isabel bryce
