

To Whom It May Concern:

There are so many obvious reasons as to why CSG is simply WRONG and should not even be happening in any part of the world.

I'm a 17-year-old girl who lives in the beautiful Northern Rivers and I am so incredibly devastated about the potential of having this incredible area ruined by mining. Not only will it make many people sick as it has in Queensland and America but it's also going to destroy our environment and our peaceful community, which is based around love, peace, tranquility and NOT money. 87% of our region voted against CSG, so for the respect and love of our country, hear our pleas. CSG is only ruining Australia, for current generations as well as future generations.

Thank you for taking the time to read this. I really hope you consider it.

Yours Sincerely
