

I John Majkut would like to say something about the proposed Legislation Amendment.

I have recently had some health issues and have become aware of how important it is to have my health information and test results available to me and future GP's on My Health Records.

This is my body, my health and my money and I dont really see why health professionals refuse to post test results on MyGov. In the past 12 months I have dealt with many health professionals and without exemption they have just gone blank when I asked if they could put my results onto MyGov. I just feel that it is so important to have all my information in one pace and available.
